MEMORANDUM OF UNDERSTANDING

This MEMORANDUM OF UNDERSTANDING (MOU) is hereby entered into by and between the Western Wayne County Mobile Field Force Team (WWCMFF) and the participating municipal police agencies signing below. The purpose of this MOU is to establish formal framework for joint actions involving these agencies as it relates to the participation of police officers on the Western Wayne County Mobile Field Force Team.

SCOPE

The First Amendment right of free speech and lawful assembly is fundamental to our society and necessary for our form of government. However, it is understood that civil unrest may result from a variety of situations, including but not limited to planned and unplanned protests, large or unpopular assemblies and acts of civil disobedience. During times of civil unrest, agencies' resources can be quickly overwhelmed, preventing adequate police response and thereby creating a substantial risk of property damage and injury to officers, participants, and bystanders. To address these challenges, the WWCMFF was created to provide resources and planning to agencies that are responding to events requiring the need for crowd control techniques or the restoration of order where the need is greater than the capabilities offered by a single agency.

AUTHORITY

This MOU is effective as of the date of signature by the chief law enforcement official of each participating agency and the municipality's chief executive officer or their designee. It shall remain in full force and effect until all participating agencies agree to cancel it or a participating agency provides 90 days' written notice to the WWCMFF Board Chair of their intent to withdraw from the team.

BOARD OF DIRECTORS

The WWCMFF Board of Directors shall be comprised of the chief law enforcement official or their designee from each participating agency and shall provide oversight to the WWCMFF. The Board shall meet on a quarterly basis to receive updates from the team Commander and discuss the business of the team. Should an issue arise that needs to be decided by a vote of the board, a majority vote of those in attendance shall rule. The WWCMFF Board Chair position shall rotate among the participating agencies on a two-year rotation.

The team Commander shall be responsible for preparing an annual budget and presenting it to the WWCMFF Board of Directors prior to December 31st of each year at the last quarterly meeting of the year. The budget will be adopted by majority vote of those in attendance at the Board Meeting.

MOBILE FIELD FORCE TEAM MEMBERSHIP REQUIREMENTS

Any exceptions to the minimum training requirements must be approved by the Team Commander. Team members who accept specialty assignments within the WWCMFF shall maintain the training and certifications of those positions as determined by the Team Commander. All team members shall adhere to the WWCMFF Use of Force Policy as approved by the Board of Directors during all WWCMFF actions.

MOBILE FIELD FORCE MEMBER PARTICIPATION REQUIREMENTS

become *Inactive*. The calendar year shall be considered January 1st through December 31st of each year. The Team Commander will determine when the *Inactive* member may return to *Active* status. The WWCMFF Board will review the circumstances pertaining to the absences and may recommend additional appropriate action to be taken.

Re: Fire Department Fleet Update

Date: November 16, 2026

Background

In September Council authorized the purchase of a used light-duty vehicle to replace the Fire Department's 2003 Expedition that is used as a light-duty rescue. Staff have tried unsuccessfully to obtain a used light-duty vehicle. The first vehicle that was identified received a higher bid to the fire authority that owned the vehicle. The second vehicle that was identified was in Illinois and had rust damage that would prevent it from being a sound purchase which was not originally identified by the current owner of the vehicle.

Staff have been unable to identify a suitable light-duty vehicle to replace the 2003 Expedition. The 2003 Expedition continues to experience reliability issues; it is only a matter of time before the unit is unable to respond to calls or becomes inoperative enroute to or during an emergency.

A used ambulance in Southeast Michigan has been identified to replace the 2003 Expedition. The ambulance was inspected by members of the Belleville Fire Department and is confirmed to meet the current and future needs of the department. The unit comes with a used Stryker power cot which would allow for the use of the vehicle for basic medical transportation in the future, should Council authorize that in the future.

Recommended Action

It is recommended that Council authorize the purchase of a used ambulance to replace the 2003 Expedition.

Discussion

The 2007 heavy-duty rescue was sold via sealed bid for $32,000 and the 1997 engine was sold for $10,000. The funds from the sale of these surplus vehicles, coupled with the currently available budget of $29,000 in the capital purchase fund for the Fire Department allows plenty of available budget to make the purchase for approximately $26,000.

The identified vehicle did not have signs of rust damage, has plenty of storage for current and future planned rescue equipment, and has complete maintenance records.

The purchase of an ambulance as opposed to a light-duty vehicle will allow for Council to easily, and quickly, move to Basic Life Support (BLS) transport in the future.

Currently there can be an extended response time from HVA depending on where their ambulance is coming from. It is not uncommon for HVA to respond from Ypsilanti or Ann Arbor. Should Council approve obtaining a limited, or full BLS transport license in the future, the City would have the equipment and vehicle necessary to do so. It is my recommendation to purchase the vehicle now as there are funds available in the capital purchase fund, there is a potential need in the near future to provide limited or full BLS transportation for residents and visitors, and having a reliable rescue vehicle is essential for the Fire Department to effectively respond to emergencies within the City.
