ZONING BOARD OF APPEALS

P.O. Box 668, 101 East State Street, Room 212
Olean, New York 14760, (716) 376-5683

Minutes for Zoning Board Meeting held Wednesday, November 12, 2025 **Olean Municipal Building – Council Chambers**

Present: Otto Tertinek, Steve Rogers, Bill Eaton, Jim Dwaileebe
Absent: Kelly Sweet, Thomas Enright, Jim Rucinski
Staff: Shawn Wing, Jacob Herbert
Other: Jackie Hitchcock

CALL TO ORDER

Recognizing a quorum, O. Tertinek called the meeting to order at 5:45 p.m.

ROLL CALL

O. Tertinek read roll call. J. Rucinski, K. Sweet, and T. Enright were absent.

READING AND APPROVAL OF THE MINUTES FROM October 22, 2025

B. Eaton made a motion to approve the minutes as presented, seconded by S. Rogers. Voice vote, all ayes. Motion carried.

NEW BUSINESS

- **515 Main Street (Area Variance #2025403)**

O. Tertinek read the area variance application from Olean General Hospital to build an addition less than eight feet from the right of way. They also are requesting an area variance to expand their parking lot into the front lawn with 10% green space. These requests if granted will vary from Article 4 Section 4.2.3, Article 4 Section 4.2.4, and Article 6 Section 6.1 of the City of Olean Zoning Law.

O. Tertinek noted that they received an incomplete SEQR and therefore they are unable to set a public hearing date. He noted that an uncoordinated review would allow the Planning Board to complete their own SEQR. He also noted that the applicant is requesting a one-year start date.

O. Tertinek made a motion to table the application until it can be completed, seconded by S. Rogers. Voice vote, ayes all. Motion carried.

OLD BUSINESS

- **138 N. 17th Street (Area Variance #2025370)**

O. Tertinek read the area variance application from Harvard Hitchcock to request the construction of a six-foot high vinyl fence 32 inches from the sidewalk. This request will vary from the front yard requirements of a corner lot per Article 28, Section 10.7.5 of the City of Olean Zoning Law.

J. Dwaileebe asked for clarification in regard to the requested fence height. O. Tertinek explained that the Zoning Law limits the height to four feet and the applicant is requesting six. He also explained that corner lots need thirty feet of unobstructed view.

- **Jackie Hitchcock of 138 N. 17th Street**

J. Hitchcock explained she was there in representation of the applicant, her father. She states that she is the resident that resides there. She would like to have an enclosed space for her three dogs. She also explained that she lives on a busy street and is looking for privacy for her seven year old daughter and herself to enjoy the outdoors without being bothered.

O. Tertinek asked where the fence would be situated in relation to the concrete pad on the side of the house. J. Hitchcock explained it would enclose the concrete pad and would be accessed by a gate. It was clarified that the fence would end more than thirty feet from the corner of N. 17th Street.

O. Tertinek stated that the height of the fence would be an issue, as the proposed area to be fenced in is considered a front yard. J. Hitchcock argued that the address is N. 17th Street and that her garbage isn't picked up when left on Washington Street. Therefore, she doesn't understand why the proposed fenced in area isn't considered her backyard.

O. Tertinek explained that the Zoning Law reads "that on corner lots, wherever a side or rear yard is adjacent to a street, side yards are to be considered front yards and that front yard standards shall apply."

B. Eaton asked if she would consider a four-foot fence or a chain link fence for better safety and visibility. J. Hitchcock explained that her dogs would be able to jump that fence and that the point of the fence is privacy.

J. Hitchcock brought up other properties with taller vinyl fences. S. Rogers explained the Board can't speak on other properties only what's in front of them and that they are simply trying to address the concern of obstructed viewpoints. J. Hitchcock argued that the large tree on the corner of N. 17th and Washington is likely more of an obstruction than the proposed fence. O. Tertinek explained that their hands are tied in regard to the Zoning ordinances and that four feet is required.

It was brought up that a variance was recently approved on N. 14th Street with a similar requested height. O. Tertinek stated that if the fence is thirty feet from N. 17th Street and there is plenty of view from the driveway that they could allow a variance from four feet to six feet.

S. Rogers made a motion to grant the variance, seconded by J. Dwaileebe. Voice vote, all ayes. Motion carried.

ADJOURNMENT

B. Eaton made a motion to adjourn at 6:07 pm, seconded by J. Dwaileebe. Voice vote, all ayes.
Motion carried.

Respectfully submitted,
Jacob Herbert

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
Project : 2025403
Date :

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: ☐ Type 1 ☐ Unlisted

Identify portions of EAF completed for this Project: ☐ Part 1 ☐ Part 2 ☐ Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the _____ as lead agency that:

☐ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

☐ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
