**HIGHLAND LAKES WATERSHED MANAGEMENT
ORDINANCE SUBDIVISION REVIEW**

Case # 2025-5798

Date: 6/9/2025

Name of Subdivision: Highland Haven, Sec 3, Lot 261-R-1

Owner: Elisha Terry

Agent: Holland Surveying

County: Burnet County

Lake: Lake LBJ

We have reviewed the proposed plat. This review was to determine compliance with the Lower Colorado River Authority's Highland Lakes Watershed Ordinance. The following is reported:

1. This subdivision consists of 1 lot(s) comprised of 0.427 acres.
2. Written notification and/or permits are required prior to commencing development activities pursuant to the Ordinance. The Permit plat notes #2 and #7 on the plat are approved.
3. This property is almost entirely within LCRA's OSSF Restricted Zone of Lake LBJ. The lot does not meet the minimum 1/2 acre when served by a public water supply. A variance request must be submitted by the owner for the lot size with any OSSF construction permit application, per standard operating procedure. Approval of the variance may be hindered by the reduction of Lot 263 due to variance approval requiring the confirmation that no lots are created smaller than the minimum 1/2 acre if reduced in size.

An Authorized Agent of the Texas Natural Resources
Conservation Commission (TNRCC)

Issued To: _____ LICENSE NO: S09717

HERVY W MCPEEK
201 CHAPARRAL
MARBLE FALLS, TX 78654

APPLYING TO SYSTEM SERVING

Located in the RESTRICTED zone on Lake LBJ in BURN County Sub: HIGHLAND HAVEN
Sec. 3 Blk. Lot 262 or otherwise described in Licensee's Application No. S09717

Inspection Date: Jun-08-1999

Acceptance of this license constitutes an agreement to abide by the terms and conditions specified in Texas Natural Resource Conservation Commission and LCRA Regulations.

A construction permit must be obtained from LCRA prior to any repair work or modification being performed to the on-site sewage disposal system.

Conditions of Approval:

1. This system is licensed to accommodate loading from a 3 bedroom residence. Should additional bedrooms or potential bedrooms be added to the structure modification of the system may be required.
2. This property is served by a dual bed on-site disposal system. Wastewater flow to the two beds must be alternated periodically by turning the flow diversion valve in order to prevent oversaturation of either bed.
3. This 1978 on-site wastewater system contains 1044 square feet of disposal area which does not meet current LCRA requirements. Current requirements for a 3 bedroom residence is 2455 square feet of evapotranspiration drainfield area. Water conservation will be required, particularly during cold and/ or wet periods. The licensee should consider modifying the system to lessen the possibility of system failure.
