

SEWER & INFRASTRUCTURE COMMITTEE MEETING

Attendance: Supervisor Mike Dvorchak, Deputy Supervisor Bart Ziegler, Town Clerk Robina Ward, incoming Town Board member Nico Hernandez, Town Engineer George Schmitt and Tim Moot of CPL, Les Coons of sewer operator H2O, Steve Bluestone.

minutesSEWER AGENDA

Insulation of sheds and sink – 90 percent complete, Mike says

Post Mortem on Rehab—George: The project is substantially complete; the site is stabilized, waiting for hatches to pump chamber and valve pit; have temp hatches in place; these are included in project cost. Reprogramming of the PLC needs to close the loop. George will present final paperwork when completed.

LES: Will go over reprogramming of PLC with George; amp loads need adjustment; will also have them adjust dosing pumps to work properly.

Mike: Overall, the project went well and on time; DEC is pleased; thanks go to the highway department for its assistance

George: The plant is working correctly now. We had a meeting with DEC on site; they commented it's the best it ever looked as far as the effluent.

DEC is redoing all permits in the area over the next few years; they will examine the plant and then reissue the permit.

Surveys:

1. In order to complete the Survey, an operator or someone with knowledge of the treatment system must have an account on nForm (<https://dec.ny.gov/maps/nysdec-nform>). Once a user logs in to the system with their form account, they simply need to search for “Descriptive Data” in the form finder and answer the questions.
2. 2023 Biosolids Management Survey: Mike will have a phone call with Les about this next Tuesday

Les to meet with Robina and Mike to finish these surveys

Next Steps

Engineering Study/Grant, or EPG

George: The grant will fund studies of all avenues, such as keeping the plant there or moving it. An intermunicipal plant will be looked at. Will also look at other types of treatment

INFRASTRUCTURE

1. Anthony/Coldwater Street

1. Surveys--Mike: we got three submissions, from CPL, FGS and Choice Words; Town Board Will review
2. Jan. 15 due date for preliminary filing; Mike: how far along should we be with right-of-way survey? Justin: We don't have to be near completion but should be underway.

2. Hamlet Park

1. Bandshell-- Bart: investigated and has two designs; the third model exceeded our budget substantially. He will continue to investigate for submission to Town Board.
2. GPL will work on a map of overall design
2. Salt Shed: Tabled until next month's meeting.
3. Committee approved applying for a Bank of Greene County grant of \$500 for purchasing a public bike rack or other amenity related to the coming link of the rail trail to the rest of the trail
4. Light pole relocation—Awaiting word from contractor on the schedule
