

## **Town of Kinnickinnic**

### **Road Committee Meeting - Minutes**

February 25, 2026

Bogdan began the meeting at 4:02 pm. The following Road Committee members were in attendance: Axel Bogdan, Bill Gnatzig, Dave Wittig, Bob LaValley, Josh Leisen, and Erik Henningsgard.

Minutes from the January 21, 2026 meeting were reviewed. Motion by Gnatzig to approve January minutes, second by Wittig, 5-eyes, motion carried.

#### **Public Comments**

No public were present at the meeting.

#### **Road and Ditch Maintenance**

Quarry Rd has some potholes forming and the road is breaking up. Will need to review at the spring road review or County maintenance might be required.

Committee will discuss the vegetative management plan for the spring at the next Committee meeting. There is concern regarding the increase of bluestem grasses and the ineffectiveness of the growth inhibitor on the species. There is interest in reviewing the County pricing verses 4-Control for ongoing vegetative management in the Town.

#### **Road Projects**

Previous years the Town has bid out maintenance projects to private companies for crack sealing and chip sealing projects. It is believed that the reason for hiring private companies to complete the work was that the County did not have the resources in prior years. The Committee will review the County's pricing when available to make a recommendation to the Board on projects for 2026.

The projects included for 2026 on the road improvements spreadsheet were reviewed. Motion by Gnatzig to move the pulverizing and paving project for Division Ave to the 2026 list, seconded by Wittig, motion carried with 5 eyes.

The 2026 project list could be bid to private contractors or the Town can opt to have the County complete the work. The Committee will discuss further when pricing is available from the County.

#### **10-year Street Maintenance Schedule**

The only update is to move the pulverize and pave of Division Ave from 2027 to 2026, all other maintenance items to remain as drafted. The 10-year plan is a good planning document to determine long-term needs but will be reviewed and updated on a yearly basis.

### **Road Adoption Ordinance**

Road adoption is included in other Town ordinance sections and therefore a standalone ordinance section is obsolete and unnecessary.

### **Next Meeting**

The next Road Committee meeting was scheduled for Wednesday, March 25th at 4:00 pm at the Town Hall (note date change). Topics for the next meeting will include Public Comments, Road and Ditch Maintenance, Road Projects, 10-year Street Maintenance Schedule, and Vegetative Management Plan.

Motion to adjourn by Wittig, second by LaValley. Motion approved unanimously. Meeting adjourned at 4:56 p.m.
