FENCE PERMIT APPLICATION

A zoning permit is required for the erection, installation or alteration of any fence within the City of New Haven. Regulations governing fences are included with this permit application and can be found in Section 405.400 of the Zoning Code of the City of New Haven. Fences less than six feet in height do not require a building permit. For fences higher than six feet in height, a building permit may be required at the discretion of the Administrative Officer. Fences should not be constructed in a way to block or limit City access to water or natural gas meters. **All applicants are strongly encouraged to call 1-800-DIG-Rite before performing any digging, grading or excavation.**

Fence Permit general terms and conditions

By issuing a fence permit, the City makes no representations regarding the location of property lines, setback lines, locations of utility easements or other like boundary lines that may affect construction of the fence and its location. Location of property lines are the sole responsibility of the property owner. By issuing a fence permit, the City confirms that the application as presented is in conformance with the City Zoning Code and that the applicant agrees to construct the fence in accordance with the permit conditions and all applicable provisions of the code.

Property address / Lot number _____

Fence plan / description (attach additional sheets if necessary)

Applicant name / Contact number: _____

Applicant Signature: _____ Date: _____

The applicant by above signature acknowledges receipt of the New Haven Zoning Code fence regulations and certifies that the fence shall be constructed in conformance with the Zoning Code and with the terms and conditions of this permit.
