

TOWN OF OGDEN DUNES WATERWORKS

Date of updated publication: October 8, 2025

The following are requirements of the Ogden Dunes Waterworks for a new/replacement water service line in the Ogden Dunes subdivision:

Fees/permits:

- 1. Tap fee/inspection fee onto main for new/replacement service lines = \$200.00**
- 2. Installing contractor to provide a \$5,000.00 street cut 'bond' if the water main is located in or within 5' of pavement surfaces. This includes any open street cut to install the service line across the street.**
- 3. Installing contractor to notify the Ogden Dunes Streets and Waterworks Director Mike Lanovich at (219) 299-5799, 24 hours prior to installation.**
- 4. All installing contractors to be licensed in the Town of Ogden Dunes Building Department prior to commencing any work.**

Materials below to be furnished and installed by the installation contractor:

- 1. All new/replacement water service taps will require a full wrap SS saddle minimum 12" in length by diameter. NO direct connections allowed. Only 'K' type copper material can be used from the main to the owner's lot line; PEX can be installed on the owner's side of the water meter.**
- 2. Corporation stop, angle valves at meter yoke, and a FORD meter yoke to accept a ¾" or 1" water meter. All fittings to be 'compression' type**
- 3. Install a minimum 24" round meter pit (HDPE, N12 pipe will suffice) by 48" in depth including a FORD 12" meter casting and cover.**
- 4. If the installation occurs in the pavement areas; backfill with in-situ soil and cap off with minimum of 6" of CA6 or IN53 aggregate; compacted prior to placement of flexible pavement surface material.**
- 5. Clean saw cut edges of pavement; replace at a minimum of 4" of HMA.**

Once the tap has been pressure tested and inspected by the Director, the Waterworks Division will furnish and install the water meter and perform the programming as needed.

Signed:

Ogden Dunes Waterworks Board.
