THE PRO PLAYGROUNDS DIFFERENCE

Equipment and Products

When you purchase playground equipment from us, you're buying direct. This means that you are getting the absolute lowest price possible. We do not utilize sales reps, middle men or distributors like many of our competitors do, this gives you more purchasing power. We have hundreds of playgrounds available for purchase and can custom design most anything to meet your needs. We have a vast product offering including shade structures, site amenities and playground surfacing like artificial turf and poured in place rubber.

Installation

We are one of only a few companies in the United States that actually service and install the products we sell in house. This means that the person you speak to when you buy your playground may very well be the person who installs it. Our competitors use local sub contractors, many of whom know nothing about installing a playground or playground safety, and worse many of whom are unlicensed, uninsured and a high risk.

Services

We are truly a full service parks and recreations firm. We take care of every aspect of your playground project in house, from the design, to the sale to the installation. We have in house capabilities that are unmatched by our competitors. From traditional construction needs like sidewalks, to the safety surfacing including poured in place rubber and rubber turf, a single contractor with a huge list of capabilities. Our competitors subcontract these services, that means higher prices, lower quality, longer lead times and a lack of accountability.

Licensing

We are State Certified General Contractors and licensed Playground Safety Inspectors. This means that we have the knowledge, experience and legal ability to complete your project. Many firms that install playground equipment are unlicensed, inexperienced and uninsured.

Experience

We have designed and installed over 500 playgrounds in the USA, from start to finish. We have experience with projects as small as \$5,000 and as large as 1,000,000. Our firm has provided expert testimony in court cases involving playground equipment. When it comes to playgrounds, we are the experts.

Accountability

We still believe that the customer is always right. We also feel that our responsibilities to our customers do not end once we have completed a sale, in fact that's when they truly begin. Our service after the sale is unparalleled. If you have any problems or issues with your equipment, we resolve the problems in house. Our competitors have only one concern and that is closing the sale.

Hi Kevin,

Rome center Wisconsin The municipal address for the Town of Rome is 1156 Alpine Drive, Nekoosa, WI 54457, and the local Town Center area is located just off State Highway 13 near Timberline Parkway and Geneva Trail.

We are trying to stay in the \$40,000 mark or lower.

Tim,

Okay I wanted to see if you can provide the address to that site again to make sure I have what I need to submit another custom quote request to see what we can come up with for this space. All in what would you say roughly the town is willing to spend at this time so I can make sure to stay within budget for you all?

Hi Kevin,

Not sure what your asking. The area around the Bandstand is all grass. Its about a acre in size. This shade structure would be on the west side to provide shade as the Sun is setting for evening concerts in the Park.

Thanks
Tim

Tim,

So our sail shades would have a lot larger posts and footers are least 3' deep for each post. What is the address to the area you want this done and maybe sending that to my manufacturer they can get a better understanding to what custom way they need to go.

FISHING KNOWLEDGE

HOW TO SELECT THE RIGHT FISHING ROD

ROD POWER

Extra fast Fast Moderate Slow

Rod action is defined by how easily and how far from the tip a rod will bend. An extra fast action rod will bend 3 to 4 inches before transferring power to the rod blank.

Some companies use the same labels for actions as they do for power (from light to heavy).

Extra fast heavy action
Fast medium/heavy action
Moderate medium action
Slow light action

Heavy power Medium power Light power

Rod power (also known as power value or rod weight) is the amount of pressure an angler has to apply to make a rod bend.

Heavier action rods require more pressure to bend, while light action rods bend easily. Ultra light rods are best for catching small bait fish.

Some rods come in additional power levels from ultra-light to ultra-heavy (and in-between levels such as medium/heavy).

Extra heavy rods are best for heavy fish in deep-sea fishing.

WHICH ACTION

SLOW (LIGHT) ACTION:

Whippy with lots of bend, which starts low near the handle. Require less sensitivity and focus more on keeping the fish hooked. Good for casting very light baits and multi-hook lures such as crankbaits, rattle baits, and jerk baits.

MEDIUM ACTION:

A little more backbone than a slow rod. The most versatile rod, effective for a wide variety of presentations and lure sizes. Good for bottom baits with its increased sensitivity, and has the flexibility to be effective with treble hook lures.

FAST (HEAVY) ACTION:

Stiff, the bend starts halfway up the rod (or more). Ideal for fishing single hook lures in heavy cover such as grass or timber. Good for heavier lures, bottom fishing, strong fish, and for throwing spinner baits, soft sticks, jerk baits, and topwaters.
