Chairman King and Chairman Cisewski had a discussion about the amount of gravel had put down on the road. 2900 yards compared to Deweys 3600 yards. But it was not known for fact how much Chairman Danczyk had agreed on. Weather the 3600 was the total amount for both town to put on or each town.

There was also a discussion if it was a north south split of east west split. It was decided in 2024 that the road would be divided north - south, and both towns will work on road projects together as one road.

Going forward it was agreed that the towns get together prior to any road work being done.

All board members took one vehicle and did a viewing of the road. It was agreed that one section needs to be raised, but overall the road looked good. It was decided that no material was needed this year.
