

# PUBLIC HEALTH ADVISORY

## for recalled Moringa Leaf Powder Products - June 11, 2026

The Massachusetts Department of Public Health (DPH) is advising consumers, retailers, and clinicians about multiple recent [Salmonella outbreaks](#) associated with recalled moringa-containing products, including powders, capsules, and other dietary supplements. Massachusetts is among the states with reported cases.

DPH, the [Centers for Disease Control and Prevention \(CDC\)](#), the [U.S. Food and Drug Administration \(FDA\)](#), and public health partners across many states have been investigating Salmonella illnesses linked to moringa products since late 2025. Since January 2026, US firms importing this product have been inspected by the FDA and state agencies. In the past year, over 150 Salmonella infections across the US have been tied back to moringa-containing products. The investigation in Massachusetts is ongoing to determine whether additional products are being distributed in the state.

### Recalled products

Consumers should check their homes for [recalled dietary supplements](#) containing moringa leaf powder. Recalled products include certain:

- TNVitamins Ultra Potent Complete Green Superfood Moringa 10,000 mg capsules
- Doctor's Pride Complete Green Superfood Ultra Potent Moringa 10,000 mg capsules
- Why Not Natural Pure Organic Moringa Green Superfood capsules
- Live it Up Super Greens supplement powders, including certain Original and Wild Berry products
- MOGO Pure Moringa Oleifera capsules

These products have been distributed nationwide, primarily online through company websites and other online retailers, including Amazon, eBay, and Walmart. Recalled products should not be eaten, sold, served, distributed, or purchased.

In addition to those listed above, other moringa-containing products have also been associated with recent Salmonella outbreak investigations. Consumers should review [FDA recall notices](#) and [CDC outbreak updates](#) before using any moringa powder, capsule, or supplement product.

## What is Salmonella?

Salmonella are bacteria that can cause foodborne illness.

- Most people infected with Salmonella experience diarrhea, fever, and stomach cramps
  - Symptoms usually start 6 hours to 6 days after swallowing the bacteria
  - Most people recover without treatment after 4 to 7 days
- Some people—especially children younger than 5, adults 65 and older, and people with weakened immune systems—may experience more severe illness that requires medical treatment or hospitalization

## When to contact a healthcare provider

Call your healthcare provider right away if you have:

- Diarrhea and a fever higher than 102°F
- Diarrhea for more than 2 days that is not improving
- Bloody diarrhea
- Vomiting that prevents you from keeping liquids down
- Signs of dehydration, such as not peeing much, dry mouth and throat, or feeling dizzy when standing up

## Action steps for consumers

- Do not eat recalled dietary supplements containing moringa leaf powder
- Throw away recalled products (listed above) or return them to where they were purchased
- Wash items and surfaces that may have touched recalled products, using hot, soapy water or a dishwasher
- Contact your healthcare provider if you develop symptoms of Salmonella infection after consuming a dietary supplement containing moringa leaf powder
- Check [FDA](#) and [CDC updates](#) for the most current list of recalled products and lot numbers

## Information for retailers

Retailers are encouraged to:

- Ensure that recalled dietary supplements containing moringa leaf powder are removed from shelves, inventory, online listings, and any other point of sale
- Remove returned recalled products from inventory and not resold
- Inform staff about the recall and instruct them not to restock affected products
- Wash and sanitize items and surfaces that may have touched recalled products

## Information for clinicians

Clinicians should be aware that multiple recent Salmonella outbreaks have been linked to moringa-containing powders, capsules, and dietary supplements. Patients may ask about these products because of recent media reports or public health advisories.

Clinicians should consider Salmonella infection in patients with compatible symptoms who report consuming moringa-containing powders, capsules, or supplements. Suspected cases should be reported through the usual infectious disease reporting process.

For more details about the outbreaks and investigations, visit:

[CDC outbreak advisory: Salmonella Outbreak Linked to Moringa Leaf Powder](#)

- [FDA outbreak investigation: Outbreak Investigation of Salmonella: Moringa Leaf Powder \(January 2026\)](#)

[CDC outbreak advisory: CDC Outbreak Linked to Moringa Capsules](#)

- [FDA outbreak investigation: Outbreak Investigation of Salmonella: Moringa Leaf Powder \(May 2026\)](#)

**[CDC: Salmonella Outbreak Linked to Moringa Leaf Powder](#)** CDC provides information about a closed 2025 multistate Salmonella outbreak linked to recalled moringa leaf powder products. No Massachusetts cases were reported in this outbreak, but the investigation is part of a broader pattern of recent Salmonella illnesses associated with moringa-containing powders and dietary supplements.

**[CDC: Extensively Drug-Resistant Salmonella Outbreak Linked to Moringa Powder Capsules](#)**

CDC provides information about a closed 2026 multistate outbreak of extensively drug-resistant Salmonella infections linked to recalled Rosabella brand moringa powder capsules. No Massachusetts cases were reported in this outbreak, but CDC notes the outbreak involved 10 cases in 8 states and was part of the broader pattern of recent Salmonella outbreaks associated with moringa-containing products.

DPH will continue to coordinate with federal, state, and local partners and share updates as new information becomes available.
