Review of the Municipal Vulnerability Preparedness (MVP) planning process and presentation of the Summary of Findings

5:40 – 6:00pm

Q&A and Input on the Summary of Findings

The Town of Peru is participating in the state's Municipal Vulnerability Preparedness (MVP) planning process, which will identify how Peru is vulnerable to climate impacts and develop strategies to better prepare for them. This process will create an opportunity for the Town to pursue up to \$3 million in grant funding for projects. The Town held two workshops, resulting in the Summary of Findings, which includes information on the local hazards affecting Peru and prioritized actions the Town can take to address them.
