Mayor Collopy
Village of Millbrook
P.O. Box 349
35 Merritt Avenue
Millbrook, NY 12545

Subject: Harts Village Road Retaining Wall
Recommendation for Award

Dear Mayor,

On December 9, 2021 the Village of Millbrook received bids for the construction of the repairs to the Hart Village Road Retaining Wall Project. Delaware Engineering, D.P.C. has reviewed the bid results for conformance with the project specifications. Attached is a complete copy of the bid results for the project. The low bidder was Shaw Contracting, LLC.

Contract #1 – Harts Village Road Retaining Wall – Shaw General Contracting of Brooklyn, NY - \$140,379.00

Delaware Engineering reached out to Shaw Contracting to discuss the project. Shaw Contracting's bid did not include references so we asked them to provide three references from the past five years. This would allow us to further vet the contractor, we have not received those references at this time. Furthermore during the conversation Shaw stated they were not familiar with the products specified on the job.

At this time we moved on to the second lowest bidder, Con-Tech Construction, to see if they were still able to perform the work and hold their price. Con-Tech said they were able to fulfill this contract if awarded. Con-Tech's bid for the project is as follows:

Contract #1 – Harts Village Road Retaining Wall – Con-Tech Construction of Carmel, NY - \$240,000.00

The bidders are in conformance with the project bid requirements. The construction bid is in line with the Engineer's cost estimate. Based on the bid results received, scheduling, and a review of the bids conformance to the project specifications, Delaware Engineering, D.P.C. is recommending that the Village of Millbrook award the contract to Con-Tech Construction.

Delaware Engineering also recommends that, prior to award of the contract, the Village of Millbrook have its legal counsel review the bid documents submitted. If you have any questions regarding the bid results, bidding process or any other project issues, please feel free to contact me at (518) 452-1290. We look forward to moving ahead on this very important project.

Sincerely,

Ablen Amrod, P.E.
Project Manager
