

Public Involvement Meeting Handout

WIS 175 Dodge East County Line to County DD Dodge County

Project ID: 3364-02-33

**April 10th, 2025
6:00pm
Theresa Town Hall**

Project information

WisDOT is proposing to improve 5.5 miles of WIS 175 between Hochheim Rd and County DD. Proposed improvements include:

Hochheim Rd to Menomonee St: Removing 2-inches of existing asphaltic pavement surface by milling and adding 2-inches of new asphaltic pavement. Improvements within this section also include the replacement of the single slab structure C-14-014, the replacement of the southwest wingwall of B-14-109, eight culvert replacements, and four culvert endwall replacements. Between Hochheim Rd to Zion Church Rd and Doyle Rd to County P, the project would pave two additional feet of shoulder to help minimize run-off-the-road crashes. This would change the typical section from 11-ft travel lanes with 2-ft paved shoulders to 12-ft travel lanes with 3-ft paved shoulders. The overall shoulder width would remain the same. Shoulder rumble strips and centerline rumble strips are proposed as well.

Menomonee St. to County DD: Replacing the full pavement structure including subgrade improvements, base course, and storm sewer. Curb and gutter is planned to be replaced at the existing location except at select sidewalk ramps. Sidewalk bump-outs are proposed at Henni St and Rock River St to help shorten pedestrian travel and to provide pedestrians better sight around parked vehicles. The sidewalk ramps will be improved to meet ADA standards to the maximum extent feasible. The project includes replacing sidewalk adjacent to building fronts (E Henni St to structure B-14-68 spanning the Rock River). The Village of Theresa is planning to replace water and sanitary utility lines as part of the project. The scope will also include replacing the deck on B-14-68 in halves.

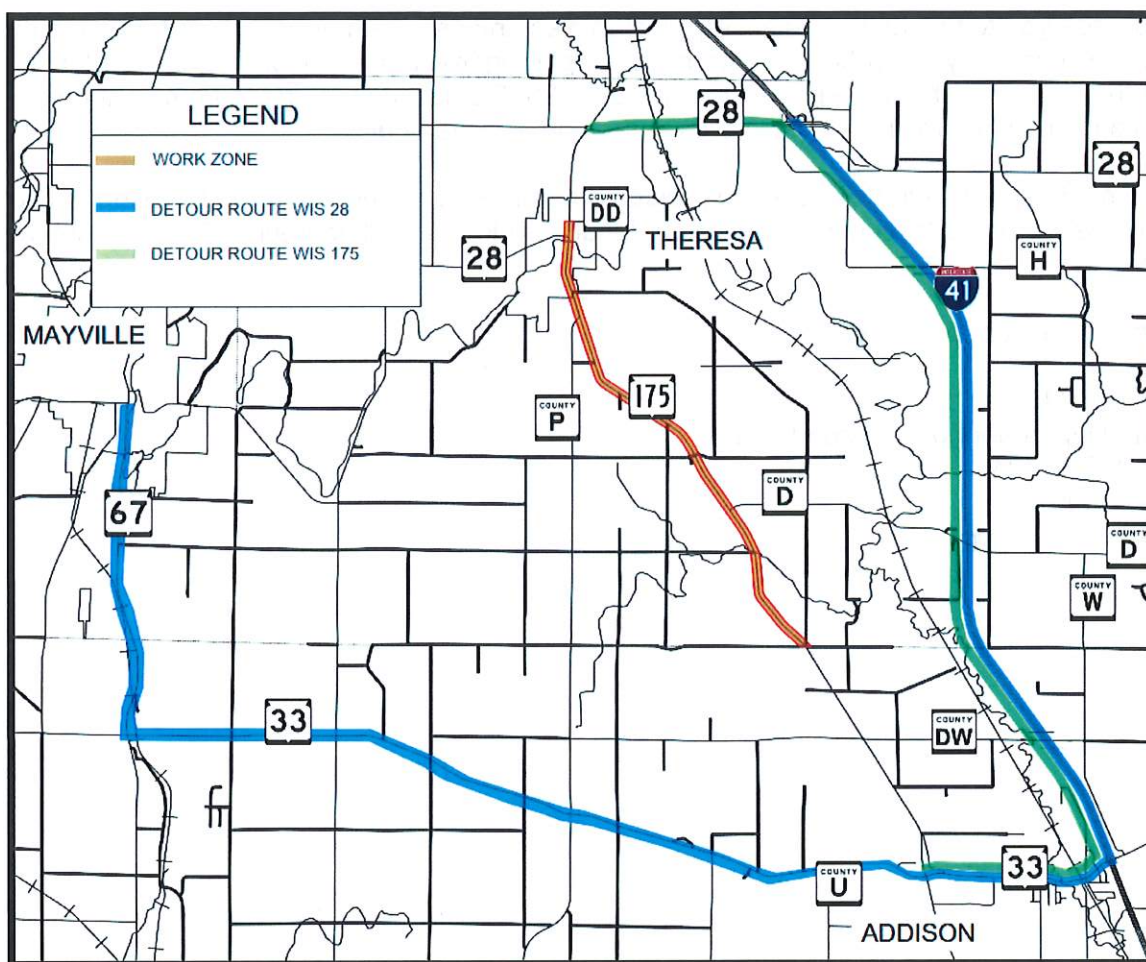

Proposed traffic impacts

Construction is scheduled to begin in Spring 2027. Construction is anticipated to take one full season from early Spring to late Fall.

During construction, WIS 28 and WIS 175 will be detoured to traffic utilizing WIS 67, WIS 33, and IH-41 as shown on the next page. Residences and businesses will still be accessible. Within the rural project limits, there will be a hard closure of WIS 175 on either side of bridge C-14-14, which is located approximately 1500 feet north of Hochheim Rd.

Within the Village limits, the bridge over the Rock River (B-14-68) will have its deck replaced in halves and one way traffic will be allowed across the bridge. This traffic will be controlled by temporary signals on either side of the bridge. Temporary driveway closures will be necessary during parts of the construction process. The contractor or WisDOT representatives will contact homeowners and businesses in advance before closing a driveway or shutting off water.

WIS 175 Detour Map

Real estate

Additional right-of-way will be required for this project. Small permanent right-of-way acquisition and temporary limited easements will be required to replace culverts, to facilitate the updates of sidewalk ramps, and to replace the bridge deck over the Rock River. WisDOT has begun the process of reaching out to the impacted property owners.

Project update/next steps

A future business coordination meeting is planned to be held the year prior to construction. The presentation will be posted on the project website found below.

Public input/comments

We encourage you to talk to the project representatives and ask them questions. Attached to this handout is a sheet for your written comments and input regarding the proposed project. Please mail any written comments about the project by April 24th, 2025 or leave them in the comment box tonight. You can also e-mail your comments to the contact listed below.

Your comments assist us in developing a project that will serve the needs of the traveling public as well as the needs of the local community. Your input is welcome and appreciated throughout the design process.
